Maxi-Router

Look at the portability that goes with that power and capacity. The Maxi-Router rolls on 10" ball bearing semi- pneumatic wheels and has V-belt stair climbers for easier transport up and down stairs.

A truck loading wheel mounted on the handle is almost like having another person helping you when you lift the machine into a truck. In addition, we've made it easy for you to remove the drum if you should want to transport the Maxi-Router in two parts.

Another important help to you is a see-through inner drum cage so you can tell how much cable is in the drum. For electrical safety, the foot pedal is air actuated, eliminating electrical contact between pedal and motor. Equally important, a ground fault circuit interrupter senses current leakage and will shut down the machine before an operator suffers an electric shock
