Машины прочистные бензомеханические Питон-Е RD-E-SL, Питон-Е RD-E-SL-C

The gasoline powered Rodrunner Model E is ideal for cleaning long runs up 500 ft. down the line. It can be coupled to either 10 ft sectional cables to clear up to 14" lines, or 5/16" municipal rods to clear up to 24" in diameter. The operator stands behind the machine and walks the cable or rods into the line.

It's driven by a powerful 208 cc Briggs and Stratton engine. Drive speed is set at 100 to 200 rpm for municipal rods or 200 to 400 rpm for sectional cables.

The "hot-shift" transmission lets you switch from forward to reverse without the need for a clutch. The long gear shift lever is within easy reach of the operator.

And features like the 3/4" drive chain and safety slip clutch to protect the cables and rods against excessive torque build-up mean low maintenance.
